

# G-Mendeliome CES Panel

## Standard / Expanded

Hereditary Diseases

### DESCRIPTION

The G-Mendeliome CES Panel has overcome the limitations of analyzing clinical diseases with whole exome sequencing. By selectively targeting the clinically significant genes, the panel enables comprehensive analysis with the most effective sequencing throughput.

### KEY FEATURES

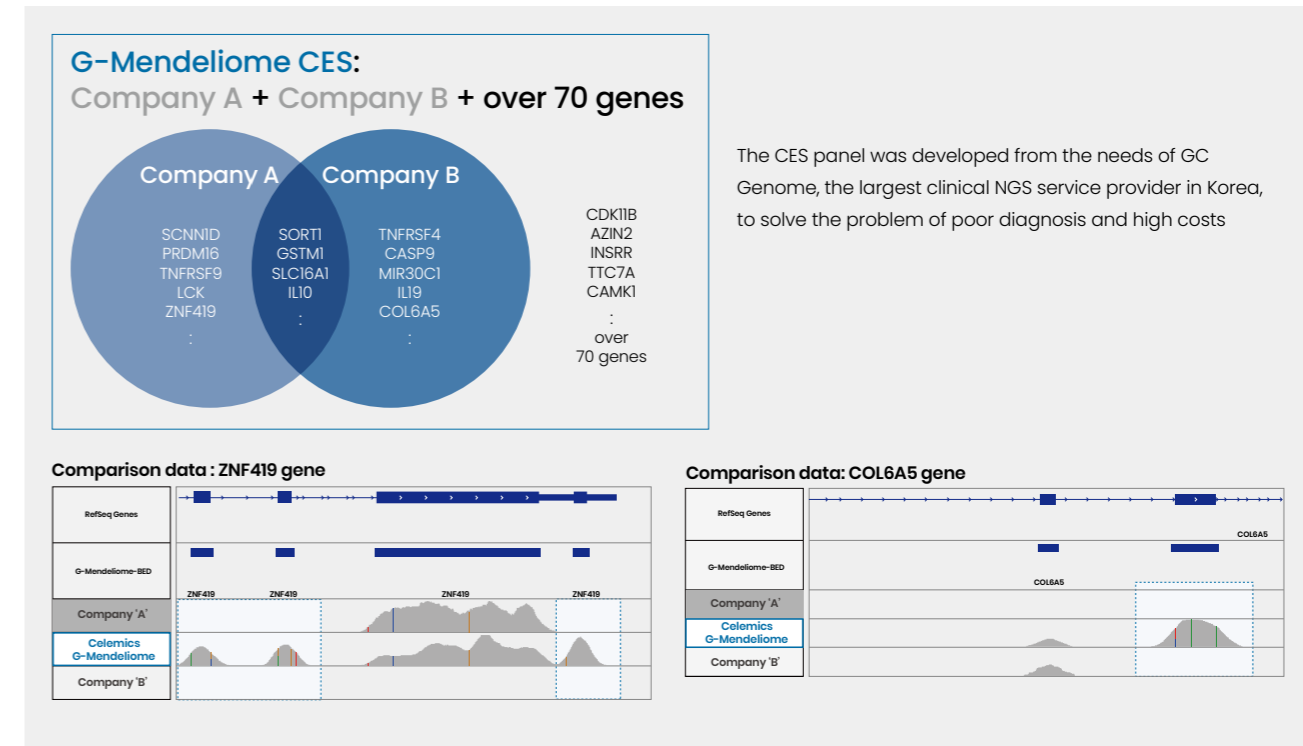

|   |   |
|---|---|
| 1. Comprehensive genomic profiling of a variety of genetic diseases | Includes 7,000 genes associated with clinically significant genetic diseases            |
| 2. A wide range of target regions                                   | Includes all clinically significant regions that are not covered from competitor panels |
| 3. Cost-effective analysis  | Able to provide accurate analysis with reduced sequencing costs compared to WES         |

### SPECIFICATION

|                         |  |
|-------------------------|--|
| Gene count*             | 5,517 / 7,563 genes  |
| Covered region          | CDS, hotspots, Mitochondrial genome  |
| Target size             | 13.8 / 19.6 Mb   |
| Mutation type           | SNV, Indel, CNV  |
| Sample type             | Blood (> 50 ng of fragmented DNA)  |
| Platform                | All sequencers from Illumina, Thermo Fisher, MGI, PacBio, and Oxford Nanopore          |
| Bioinformatics pipeline | Primary, Secondary and Tertiary analysis result (FASTQ to VCF, VCF to Clinical report) |

### PANEL PERFORMANCE

|                      | Celemics | Company A | Company B |
|----------------------|----------|-----------|-----------|
| On-Target Read Ratio | 82.8%    | 65.9%     | 80.8%     |

### PACKAGE COMPOSITION

| Package name      | Compositions               |                    | Package option           | Options         |                     |
|-------------------|----------------------------|--------------------|--------------------------|-----------------|---------------------|
| Target Enrichment | Target capture Probe       | -                  | Pooling method           | Single Reaction | Pre-capture Pooling |
| Standard          | Target Enrichment reagents | Library prep Kit   | Library Preparation kits | Standard Kit    | EP-kit              |
| All-in-One        | -                          | Beads / Polymerase | Hybridization Enhancer   | Included        | Not included        |

## LIST OF DISEASES ASSESSED BY G-MENDELIOME CES PANEL

| Category              | Related Diseases                           |
|-----------------------|--|
| Cardiology            | Aortopathy and connective tissue disorders |
|                       | Arrhythmia                                 |
|                       | Cardiomyopathy                             |
|                       | Congenital heart defect                    |
|                       | Dyslipidemia                               |
|                       | Other cardiovascular diseases              |
|                       | Pulmonary hypertension                     |
| Dermatology           | Adams-Oliver syndrome                      |
|                       | Albinism                                   |
|                       | Cardiofaciocutaneous syndrome              |
|                       | Cutis laxa                                 |
|                       | Dyskeratosis congenita                     |
|                       | Ectodermal dysplasia                       |
|                       | Ehlers-Danlos syndrome                     |
|                       | Epidermolysis bullosa                      |
|                       | Hereditary acrodermatitis enteropathica    |
|                       | Hermansky-Pudlak syndrome                  |
|                       | Hypotrichosis                              |
|                       | Ichthyosis                                 |
|                       | Neurofibromatosis                          |
|                       | Pachyonychia congenita                     |
|                       | Palmoplantar keratoderma                   |
|                       | Progeria and Progeroid Syndromes           |
|                       | Skin cancer                                |
|                       | Tuberous sclerosis                         |
|                       | Waardenburg syndrome                       |
| Xeroderma pigmentosum |  |
| Endocrinology         | Adrenal hyperplasia                        |
|                       | Diabetes                                   |
|                       | Hyperinsulinism                            |
|                       | Hyperparathyroidism                        |
|                       | Hypothyroidism                             |
|                       | Kallmann syndrome                          |
|                       | Multiple endocrine neoplasia               |
|                       | Obesity                                    |
|                       | Pancreatitis                               |
|                       | Premature ovarian failure                  |
|                       | ENT  |
| GI/Hepatology         | Cholestasis                                |
|                       | Congenital diarrhea                        |
|                       | Congenital hepatic fibrosis                |
|                       | Gastrointestinal atresia                   |
|                       | Hirschsprung disease                       |
| Hematology            | Polycystic liver disease                   |
|                       | Anemia                                     |
|                       | Bleeding&Thrombotic disorder               |
|                       | Bone marrow failure                        |
|                       | Congenital neutropenia                     |
| Immunology            | Hemochromatosis                            |
|                       | RBC membrane disorder                      |
|                       | Antibody deficiencies                      |
|                       | Autoinflammatory disorders                 |
|                       | Combined T/B cell deficiencies             |
|                       | Complement deficiencies                    |
|                       | Defects in intrinsic and innate immunity   |
|                       | Immune dysregulation                       |
|                       | Phagocytic defects                         |
